

Golden Night Anniversary 300B H/W

Golden Night Anniversary 300 B H/W (single ended) (kod-AUD0034)

Audion Golden Night self cancelling single ended 300B mono-block forms part of our High End line-up of power amplifiers, using the well known 300B tubes. This amplifier is hand built and hard wired using solid silver 5 *9's in all of the audio path. Wherever possible the components are sourced from Europe and the USA and avoiding inferior Chinese components.

This triode based mono-block amp uses no (zero) feedback in the design. The chassis is black powder coated aluminium as is the transformer cover. The top plate and badge are mirror finished stainless steel.

Amplifier matching

The Golden Night being silver wired with a large polyprop power supply is able to retrieve great musical detail and nuances, far in excess of the Silver Night range.

The Golden Night SCSE amplifier comes with JJ 300B's but can also be made with PX25 tubes upon request. This amp is best suited for use with loudspeakers of 89db or better efficiency. Ideally matched with our range of Electron cables. The amps deliver 10 watts into 8 ohms from a 300B. Upgrade options are available for this model, see upgrade options at end.

Quality both inside and out

Having a volume control on the front and mono inputs on the rear means that a pre-amplifier is not necessary with this unit, but is advised. These amps are all auto biased. It will take almost any 300b (Unit is supplied with JJ 300b's). The Golden Night Anniversary self-cancelling single-ended amplifier 300b Class A power amplifier has 4 & 8 ohm outputs and mono inputs. Level 8 interior shown.

The Golden Night SCSE amplifier is hard wired (Air Wired©) Class A mono-block power amplifier. It is built with components sourced from Europe and the US. Where possible we avoid the use of any Chinese component. Our output transformers are wound in-house to our exacting standards and many of the components are either made by us or specifically for us. We use JJ 300B's and Audion's own CVX100 & CVX120 as input & driver tube. This amp is designed for finesse, data retrieval, depth of field and musicality.

Power	2 x 10 Watts Class A into 8 Ohms at 240V AC
Sensitivity Ref Load	>150mV 4-8 Ohm
Distortion @ 1Watt	<0.1%
Frequency Response	10 > 38 KHz ±3 dB RIAA
Signal to Noise	< -90 dB
Consumption	90 Watts x 2
Tubes	(1 x 300B, 1 x CVX120, 1 x CVX100) x 2
Size	42 cm deep, 23 cm wide and 19 cm tall- less tubes
Weight	11 kg
Fuses	Power 500mA / 240V
Warranty	2 years - tubes 6 months
